Saif Fadhel

Software Engineer

Mississauga, Ontario

647-447-8778 | reachsaif.f@gmail.com | saiffgit.github.io | SaifFGit | SaifFDevPost | saiffadhel

Skills

Programming Languages - Python, Java, C, C++, HTML/CSS, JavaScript, SQL, Assembly (NASM), Kotlin, MATLAB, Elasticsearch

Technologies and Concepts - GIT, Unity (2D/3D), Databases, LaTeX, Bash, Doxygen, Android Studio, Node.js, React, AWS, Jira, Elastic/Kibana, Grafana, Netscout/nGeniusOne, Infoblox, Kubernetes, Openshift Cloud Platform, Openstack

Algorithms and Data Structures - Stacks, Queues, Bubble Sort, Quick Sort, Depth-First Search

Linux-Based Developer Tools and Debugging Environments - GCC, GDB

Microsoft Office Administration Tools - Microsoft Word, Microsoft Excel, Microsoft PowerPoint

Education

McMaster University - Bachelor of Engineering (B.Eng.) - Software Engineering (Co-op) **Sept. 2017 - Apr. 2022**

Relevant Coursework:

- Engineering Computation (A+)
- Software Project Management (A+)
- Software Design (A+)
- Software Engineering Capstone (A+)
- Software Testing (A)
- Computer Networks and Security (A-)

Experience

Bell Canada - Network Specialist - 5G Core Data Mississauga, ON L4W 5R1 **Jan. 2024 - Present**

- Worked with the 4G/5G Core Network Wireless Teams to maintain network stability and provide network connectivity and support to clients
- Tested and Performed Network Function Upgrades which contributed to Bell winning the Ookla Q1-Q2 2023 Speedtest Awards
- Collaborated with other internal and external teams to conduct trace analysis for core network troubleshooting purposes

Bell Canada - Network Specialist - 4G Core Data Mississauga, ON L4W 5R1 **Jan. 2023 - Jan 2024**

- Custom Enterprise APN design and implementation
- Monitor health/status of the following network elements HSPA (SGSN, GPRS DNS), LTE (MME, PGW/SGW), VoWifi (EPDG, AAA)
- Deploying Virtual Network Functions (VNF) in Infrastructure as a Service (IaaS) environment

Ericsson - 5G Software Test Developer - Ottawa, ON K2K 2V6 **Jan. 2021 - Dec. 2021**

- Verified the deployment and stability of 4G/5G Network Radio Software on over 50 tracks by applying quality management skills
- Utilized a test-driven development approach to create robust test cases and applied principles of agile methodology
- Designed and deployed automated test scripts for clusters of nodes on Jenkins to monitor the success of builds

Projects

Personal Website (HTML/CSS) - GitHub **Jan. 2020**

- Built a website using HTML and CSS from scratch utilizing bootstrap elements and hosted on GitHub at https://saiffgit.github.io
- Constructed a dynamic Projects section listing featured academic and independently developed projects
- Incorporated problem-solving skills to produce the most efficient implementation possible for the website

Connecting Autonomous Vehicles (Python) - GitHub - DevPost **Sept. 2020**

- Achieved 1st place in Delta Hacks VI for creatively using environmental data to connect autonomous vehicles using Innovation Factory's system
- Helped train a Deep Learning Yolo model using a CNN to identify snow patches to dynamically reduce the speed limit of an Autonomous vehicle
- Communicated effectively with team members to adhere to Agile Methodology during the project's development

CrimeCheck (Java) **Mar. 2020**

- Developed an app using depth-first search to indicate recommended walking paths for civilians in the NYC area; avoiding crime-ridden areas
- Demonstrated leadership by managing a group of 4 colleagues and delegating the required activities according to individuals' area of expertise
- Took the initiative to collaborate with each team member to develop ideas to optimize the front-end and back-end of the application

Extracurricular Activity

McMaster AI Club - Core Member **Oct. 2019 - 2020**

- Attended various Artificial Intelligence tutorial sessions and engaged in Google Colab coding sessions
- Learned about the mathematics used in convolutional neural networks

Honors & Awards

Delta-Hacks VI - McMaster University's Annual Hackathon - 1st Place **Feb. 2020**

- Placed 1st for the ITE Challenge in McMaster's Annual Hackathon, Delta-Hacks VI
